

## National Alliance for Drug Endangered Children National DEC Help, Hope, Support Crisis Bags Research

In an effort to reduce negative outcomes for children and youth impacted by opioids and other substances through trauma-informed interventions National DEC developed the Help, Hope, Support Crisis Bags. These Crisis Bags can be provided to children and families by any professional who may be interacting with the family due to substance misuse and/or who are providing other services and supports to the family.

National DEC reviewed research articles and other sources while developing the Crisis Bags and the materials included in them. The following sources and references support the intent of the Crisis Bags to reduce negative outcomes for children and youth impacted by substances.
